FORESTHILL TELEPHONE COMPANY, INC.  
2013 Annual 54.313 Report of High-Cost Recipient

54.313(a)(6) Certification

54.313(a)(6) Certification that the carrier is able to function in emergency situations as set forth in §54.202(a)(2)

The following provides information that Foresthill Telephone is able to function in emergency situations as set forth in §54.202(a)(2).

Back-up Power

Foresthill Telephone has a reasonable amount of fixed generator back-up power, fueled by diesel, propane, gasoline, and battery to ensure functionality without an external power source for its host switch and remote terminals. This includes stand-by portable generators available for deployment.

Ability to reroute traffic around damaged facilities

Foresthill Telephone is a single exchange company and has built alternate route facilities within its exchange and between our exchange and connecting companies. These redundant facilities are in the form of Microwave facility connections with AT&T.

Foresthill Telephone has alternate routing capabilities to interexchange carriers and interconnected local exchange providers. They are Foresthill Telephone's interconnection to the Public Switch Telephone Network (PSTN).

Capability to manage traffic spikes resulting from emergency situations

The host switching fabric is non-blocking. All of Foresthill's host-remote links are engineered to a 4 to 1 concentration ratio. Foresthill's transport capacity to the PSTN can handle 556 simultaneous calls.

Foresthill Telephone takes no responsibility for the capabilities of interconnected networks to manage traffic spikes resulting from emergency situations, but we will continue with our best efforts to ensure the capability of our network during such an event.
